Limited Volume InterlockedTM Standard Crimp Top Vials

The Finneran Interlocked $^{\text{TM}}$ Vial is composed of a 12x32 glass vial and a clear glass limited volume insert fused together. This design eliminates movement of the insert, allows more consistent sample recovery, eliminates needle damage and concerns about contaminants around the fused seam/space between the neck of the vial and the insert. Available with marking spots.

Case Pack - 100 pieces	
Cat. No.	Description

Crimpers/Decappers for 11mm Crimp Vials

J.G. Finneran Crimpers and Decappers are designed, and manufactured using quality materials, and finishing techniques to provide a consistent and dependable seal while maintaining their durability, and long life. The standard hand crimpers are provided with an adjustable stop, allowing the operator to repeatedly achieve a quality crimped seal. All parts that contact the crimp seal are stainless steel or plated. The crimper jaws are hardened and polished to provide smooth, consistent operation.

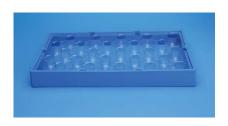

Sold Individually Cat. No.	Description

30711T-1232	750μL TPX (Polymethylpentene) LVV

Snap Top Caps™

Caps may be snapped on and off by hand which eliminates the need for metal crimping and decapping tools, thus reducing potential hazards due to sharp aluminum metal edges. Large opening top provides greater target area for needle penetration. Available in a variety of colors for easy sample identification.

Accessories

Crimpers & Decappers

J.G. Finneran Crimpers and Decappers are designed, and manufactured using quality materials, and finishing techniques to provide a consistent and dependable seal while maintaining their durability, and long life. The standard hand crimpers are provided with an adjustable stop, allowing the operator to repeatedly achieve a quality crimped seal. All parts that contact the crimp seal are stainless steel or plated. The crimper jaws are hardened and polished to provide smooth, consistent operation.

Vials

31811-1232A, 31811-1232, 31811E-1232A, 31811E-1232

The Snap Seal™ Vial can be securely sealed with the patented Poly Crimp™ Seal, an aluminum crimp seal or a variety of Snap Top Cap™ designs. More glass in the neck area minimizes breakage of the neck during decapping. Vial incorporates the unique StepVial design that precisely centers a limited volume insert in the vial neck, assuring dependable, reliable use with autosamplers. Choose from clear or amber Type I borosilicate glass. Available with graduated marking spots which provides the ability to fill a sample vial to a desired level and facilitates viewing sample volumes.

Shelf Pack - 100 pieces; Case Pack - 1000 pieces

Limited Volume Snap Seal[™] Vials

The Finneran InterlockedTM Vial is composed of a 12x32 glass vial and a clear glass limited volume insert fused together. This design eliminates movement of the insert, allows more consistent sample recovery, eliminates needle damage and concerns about contaminants around the fused seam/space between the neck of the vial and the insert. Available with marking spots.

The 9mm Transfer Ring Vial for use in robotic arm autosamplers. The transfer ring allows a robotic arm to pick up the vial without having a closure attached. When the transfer ring vial is used with a closure the ring prevents over-torquing (over-tightening) while providing a tight seal and eliminating any evaporation concerns.

Polypropylene and TPX Vials

Polypropylene vials are an economical alternative to glass. Finneran polypropylene vials are manufactured from chemical resistant polypropylene. TPX vials provide the clarity of glass and safety of polypropylene, and can withstand maximum temperature up to 175°C. Amber polypropylene adds protection for light sensitive samples. Black polypropylene protects light sensitive samples from having a chemical reaction during sampling. testing, storage, or transport.

J.G. Finneran the industry leader in quality chromatography vials and accessories now offers CERTACLEAN® Vial Kits for LC and Mass Spec. Understanding the importance of using particulate free vials for sample preparation, our vials are tested to meet the high standards our customers require. LC Certified and Mass Spec Vials are available with or without graduated marking spots. Choose from bonded PTFE/Silicone or bonded PTFE/Silicone with slit septa. Our sealed and re-closeable container includes:

- (100) Certified 2.0mL screw thread vials
- (100) 9mm royal blue closures with bonded septa
- Certificate of Conformance

CERTACLEAN® Vial Kits (with Certificate of Conformance)

LC Certified Vial Test Parameters include:

- Glass Type I, Class A, 33 Expansion Clear or 51A Amber Borosilicate
- · Dimensions Height, Diameter, Bottom Thickness, Neck Length, Thread Profile, Annealing
- Cap/Septum Diameter, Height, Thread Integrity, Center Flash, Septa Insertion
- Chemical Test HPLC Test Non-volatile residue, GC Test Volatile Residue

Limited Volume Big Mouth Screw Thread Vials

The Finneran Interlocked $^{\text{TM}}$ Vial is composed of a 12x32 glass vial and a clear glass limited volume insert fused together. This design eliminates movement of the insert, allows more consistent sample recovery, eliminates needle damage and concerns about contaminants around the fused seam/space between the neck of the vial and the insert. Available with marking spots.

Closures

Screw Thread Closures

Larger opening provides increased target area for needle penetration. Closures are ideal for autosamplers requiring closures to support or hang in vial tray (Hitachi, Jasco, Shimadzu). Available in a wide assortment of colors. The Top Seal™ closure with a 10mil molded septa allows for easy needle penetration and is inert to most solvents. The one piece design saves time by eliminating the process of assembling liners in the closures.

5400FT-12	12mm Clear Polyethylene Flat Top Snap Plug	

Polyethylene Conical Snap Plugs with Starburst (12mm)

Starburst and conical design of the snap plug provides self-centering needle penetration guidance as well as better resealability of plug after use. Plug is designed to easily push in and remove from the vial. Tight fit offers good sealability.

Shelf Pack - 100 pieces; Case Pack - 1000 pieces

Cat	t. No.	Description
540	05SB-12*	12mm Clear Polyethylene Snap Plug
541	10SB-12	12mm Clear Polyethylene Snap Plug, Pre-scored Starburst

 $^{^{\}ast}$ Available in additional colors; (B) Blue, (G) Green, (R) Red, & (Y) Yellow

Shell Vials, 12x32mm, 12mm Plug

Limited Volume Inserts

All Glass Inserts are available Silanized.

4025BS-629, 4025PBS-631, 4025BSFT-629

Multi-Plugs with Safety Sleeve

The Multi-Plug Safety Sleeve is available in clear K-resin or black glass reinforced polypropylene. Use it as a tool to make plug and shell vial assembly easier and safer. The safety sleeve is "Multi" useful because it is designed to work with 1mL, 2mL or 4mL shell vials. One Safety Sleeve works with all three sizes.

Case Pack - 5 pieces

Cat. No.	Description
9200-81215	Multi-Plug Safety Sleeve Clear
9200-81215B	Multi-Plug Safety Sleeve Black

Due to the conical design of the snap plug, limited volume inserts used in the shell vial stay centered and straight allowing for easy sample evacuation.

Vials

32012-1232, 32012-1232A, 32012M-1232, 32012M-1232M, 5004-12, 5005-12, 5003-12G

The Versa Vial™ is a 12x32mm shell vial with a modified neck that allows pick-up by an autosampler. This vial can be used in most autosamplers that currently use 12x32mm vials. The vase-like design of the Versa Vial™ system has the largest opening available for any autosampler. The elongated pick-up area, in the neck, accommodates variations in the robotic arm settings for reliable sample pick-up. The wide ID, 9mm opening, allows samples to be added using a pipet tip. Choose from clear or amber Type I borosilicate glass. Marking spots are available.

Shelf Pack - 100 pieces; Case Pack - 1000 pieces

Cat. No.	Description
32012-1232	2.0mL Clear Vial

Crimpers/Decappers for 13mm Crimp Vials

J.G. Finneran Crimpers and Decappers are designed, and manufactured using quality materials, and finishing techniques to provide a consistent and dependable seal while maintaining their durability, and long life. The standard hand crimpers are provided with an adjustable stop, allowing the operator to repeatedly achieve a quality crimped seal. All parts that contact the crimp seal are stainless steel or plated. The crimper jaws are hardened and polished to provide smooth, consistent operation.

9601-15	25 Position Insert Tray for Universal Vial Rack $^{\text{TM}}$ for 15mm Vials

Shell Vials for Waters WISP™, 8mm Plug

Finneran Products Certified For ScienceTM

Vials

4100-840, 4100-840A

Designed to work in the Waters WISP™ 96 position autosampler. Available in clear or amber Type I borosilicate glass, or polypropylene for easy disposal. Vials feature thicker walls for safer sample handling. Limited volume shell vials have a precisely designed conical bottom which permits maximum sample evacuation.

Polyethylene Snap Plugs with Starburst (8mm)

Starburst and conical design of the snap plug provides self-centering needle penetration guidance as well as better resealability of plug after use. Plug is designed to easily push in and remove from the vial. Tight fit offers good sealability.

Shelf Pack - 100 pieces; Case Pack - 1000 pieces

Cat. No.	Description

Multi-Plugs with Safety Sleeve

The Multi-Plug Safety Sleeve is available in clear K-resin or black glass reinforced polypropylene. Use it as a tool to make plug and shell vial assembly easier and safer. The safety sleeve is "Multi" useful because it is designed to work with 1mL, 2mL or 4mL shell vials. One Safety Sleeve works with all three sizes.

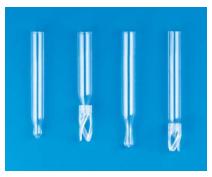

Case Pack - 5 pieces

Finneran Products Certified For ScienceTM

Vials

Flat Bottom Crimp Headspace Vials

Flat Bottom Threaded Headspace Vials

Round Bottom Crimp Headspace Vials

Round Bottom Threaded Headspace Vials

Headspace vials and closures must form a analysis with reproducible results. Available in clear or amber Type I borosilicate glass with crimp or screw thread finishes. The vials are used to heat the sample until the concentration of the liquid and gas phases are in equilibrium. A sample is then taken from the gas phase (headspace) for analysis.

Standard Headspace Vials with Flat Bottoms

Use in Agilent, DANI, Fisons, Perkin Elmer and Shimadzu

SPME Specialty Vials with 20mm Crimp Top and Rounded Bottoms

The new Finneran SPME Vials, with a thicker lip, are ideal for most SPME applications. The thicker lip vial creates a tighter seal on the vial. The Finneran SPME Vials are manufactured from high quality Type 1 borosilicate glass. This new thicker lip vial is available in 10mL and 20mL capacities. To complete the package, Finneran offers the 20mm gold magnetic seal, 8mm hole with a thin 0.60" PTFE/silicone seal. The thin seal is a perfect choice for SPME applications.* The thin seal extends the life of the needle and is available in blue or clear.

Shelf Pack - 100 pieces; Case Pack - 1000 pieces

Crimpers/Decappers

J.G. Finneran Crimpers and Decappers are designed, and manufactured using quality materials, and finishing techniques to provide a consistent and dependable seal while maintaining their durability, and long life. The standard hand crimpers are provided with an adjustable stop, allowing the operator to repeatedly achieve a quality crimped seal. All parts that contact the crimp seal are stainless steel or plated. The crimper jaws are hardened and polished to provide smooth, consistent operation.

Crimpers and Decappers

Light weight and easy to operate, our Pneumatic Crimping Tools enable handheld semi-automatic crimping and decapping of vials and bottles with less effort. Interchangeable jaws allow for use with a variety of sizes and types of crimp seals including 8mm, 11mm, 13mm, 13mm flip-off, 20mm and 20mm flip-off. Pneumatic operation provides fast and dependable performance. Lightweight, and evenly balanced Crimp pressure and intensity setting can be quickly and easily adjusted. Crimping cycle time is adjustable between 0.75 seconds and 1.5 seconds, allowing faster completion of crimping job. Corrosion resistant finishes throughout. Tool is manufactured using stainless steel and hard coated corrosion resistant plating. (Autoclaveable models also available.)

Specialty Items

Finneran Products Certified For ScienceTM

Capsule Holders

For use in dissolution vessels. Three prongs hold the capsule in place, permitting the completion of dissolution tests without capsule flotation.

Sold individually

Cat. No.	Description
91700-00	Black Capsule Holder
91700-01	Black Metallic Capsule Holder

Ampoule Holders

The Finneran Ampoule Storage Holder seals itself to your open ampule, allowing for easier sample storage, and eliminating the need to transfer the contents.

The added spring allows for easy access and removal of the ampule.

Just break off the 2mL ampule top, place the ampule in our storage holder, and attach the closure. Easily inject through the open top screw cap/stopper to remove your sample.

Made from K-Resin

Sold individually

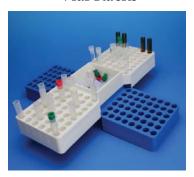

Cat. No.	Description
9450-01	2mL Storage Ampoule Holder with Spring, Stopper and White Polypropylene Closure for Snapped Open Ampoules

Vial Racks

Finneran Products Certified For ScienceTM

Vial Racks

Snap Racks™

Snap Racks™ are constructed of durable glass reinforced polypropylene, with a center well to conveniently hold caps, seals, septa, etc. Racks snap together securely to double your rack capacity.

Case	Pack	- 5	pieces
